

### **Job Opportunity**

#### **Live Stream Media Tech (Part-Time)** FPC Houston | [fpchouston.org](http://fpchouston.org)

FPC Houston is seeking an individual with oversight of technology needed to ensure an optimal live stream experience. As a Live Stream Media Tech, you will support the technical aspects of Sunday live streams. Responsibilities include set-up and maintenance of live stream equipment, monitoring live broadcasts, and troubleshooting issues, as needed.

#### **Key Areas of Responsibility:**

- Weekly testing of live stream system and maintenance of equipment
- Participation in Sunday rehearsals to ensure video and audio quality
- Monitoring live services to mitigate sound/video issues and troubleshoot broadcast issues as needed
- Assist with audio and video archives of worship services.

#### **Qualifications:**

- Experience or familiarity with running a live stream via OBS or vMix to platforms such as Vimeo, Facebook, YouTube for streaming the services and special events
- Working knowledge of current audio, video, livestream, social media technology, lighting and video production systems in a live worship setting.
- Familiarity with MAC and PC computer hardware and ability to assist with basic troubleshooting and minor maintenance/system upgrades. Networking knowledge would be a plus.
- Understanding PTZ cameras (or similar) and the interfaces such as SDI, USB, and HDMI connections and lighting levels.
- Understanding of lighting, video production systems, and audio mixing as they relate to providing an optimal live stream experience
- Ability to think quickly and react/troubleshoot appropriately in high stress situations
- Good communication and interpersonal skills.

**Nice to have:**

- Experience with presentation software such as ProPresenter or similar programs for creating slides and lower thirds and/or other methods of creating animated titles, displaying lyrics, etc
